Title: Electrochemotherapy Combined with Standard and CO₂ Laser Surgeries in Canine Oral Melanoma

Author and corresponding author: Julita Kulbacka

**Editor-in-Chief of
Slovenian Veterinary Research**

Dear Editor,

Please find enclosed the manuscript of our paper entitled: "*Electrochemotherapy Combined with Standard and CO₂ Laser Surgeries in Canine Oral Melanoma*". This paper is intended to be a case report type paper. This work has not been published, is not under consideration for publication elsewhere, and its submission for publication has been approved by all of the authors and by the appropriate authorities at the institutions where the work was carried out. All authors have contributed significantly and are in agreement with the content of the manuscript.

The present study reports that the protocol combining ECT and surgery can be efficiently applied in severe melanoma treatment.

With regards

Julita Kulbacka
